Please think of 4 potential applications of telerobotics. In one or two paragraphs, answer the following questions:

1. Describe the application—eg., type and size of robot, user interface for tele-operation, sensors (what they measure, where they are placed)
2. Why is telerobotics needed for your imagined application?
3. Who will benefit from this use of telerobotics and why (eg., patient, doctors, military, type of consumer, companies)?
